I am a senior year undergraduate student studying Computer Engineering at Colorado State University.
I have a passion for programming and electronics, with interests in low-level, embedded, and kernel-space programming.

Education

Colorado State University   **Fort Collins, CO**
Bachelor of Science in Computer Engineering, Minor in Mathematics, Minor in Computer Science   *Graduating May 2022*

- **Relevant Coursework:** Compilers, Fault Tolerant Computing, Computer Micro-Architecture, Software Engineering, Operating Systems, VLSI, Computer Networking, Analog and Digital Circuit design, Signals and Systems
- **Senior Design:**
  - Designing and implementing an embedded systems framwork for enterprise-grade quadrapedal robotics applications
  - Extending existing open-source designs to provide feature-parity with existing industry solutions at a fraction of the cost
  - Collaborating with ECE Outreach to excite middle and high school students about Electrical and Computer Engineering

Technical Skills

- **Programming Languages:**
  - Procedural   ARM Assembly, Bash, **C**, Fish, Matlab, MIPS, Spice, Verilog
  - Object-Oriented   Arduino INO, **C++**, Java, **JavaScript**, Python, **Rust**, VBS
  - Functional   Lisp, Elisp, LaTeX, Scala
- **Libraries and Frameworks:**
  - Graphical   Native X11, XCB, Cairo, Pango, Unicode CLDR, GTK, Qt, Android API, ncurses
  - Computational   GMP, OpenMP, OpenCL, OpenGL, GLSL, Rink.rs, Sage
  - Web Based   Rocket.rs, Zola, ReactJS, VueJS, NodeJS, ExpressJS, jQuery

Work Experience

Platform Engineering Intern   **Fort Collins, CO**
Hewlett Packard Enterprise – NonStop Low-Level Team   *May 2021 – Aug 2021*

- Designed a performance modeling library to mock enterprise-grade RDMA behavior without dedicated hardware
- Proved feasibility of an implemtation method that would drastically reduce startup cost for new customers
- Worked in C++ with InfiniBand and NSK to invisibly apply modifications to existing benchmarks and applications

Software Development Intern   **Fort Collins, CO**
Hewlett Packard Enterprise – NonStop Manageability Team   *May 2020 – Aug 2020*

- Improved and optimized OSM, the main application for maintaining, updating, and upgrading NonStop servers
- Migrated critical security procedures from CLI to GUI, cutting down on time overhead and human error for end-users
- Worked in Java, using Swing, AWT, RMI, and several internal HPE libraries

Programming Instructor   **Fort Collins, CO**
Tech Corps   *Jul 2019 – Aug 2019*

- Lead multiple week long summer camps aimed at Middle and Elementary School students
- Prepared and delivered material covering programming fundamentals, theory, and applications
- Delivered lessons and projects in Scratch, MIT App Inventor, and Python

Notable Projects

hotpatch   **v0.3.0 Released Feb 2021**
 Shizcow/hotpatch   ⊛ *docs.rs/hotpatch*

- Rust crate for cross-platform hot-reloading of functions and methods at runtime as easily as possible
- Guarentees memory saftey, thread saftey, deadlock protection, type correctness, and namespace parity

dmenu-rs   **v5.5.1 Released Dec 2020**
 Shizcow/dmenu-rs   *arch::aur::dmenu-rs*

- A program launcher, unit-aware calculator, spellchecker, search engine dispatcher, and general purpose menu for Linux
- A port of the popular GNU utility dmenu to Rust, offering increased speed, lower memory usage, and extensive plugin support
- Maintains perfect backwards compatibility, garnering thousands of users and 100+ stars on GitHub
